LK AUTOMOTIVE PVT. LTD. - BARODA

AN IATF 16949 COMPANY &

ISO 9001-2015 CERTIFIED BY TUV RHINELAND

**Mfg. & Serving Customised Tubular Metal Assemblies & Design
Development Services : For Automotive & Engineering Sector**

Export to USA EUROPE AND AUSTRALIA

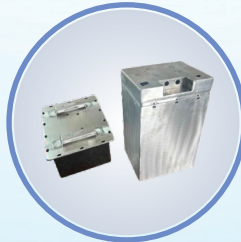

LK AUTOMOTIVE PVT LTD-BARODA

CASYDH METAL ASSEMBLIES - POR

**APPLICATION : TRUCK
LNG TANK SHROUD**

AUTOMOTIVE BATTERY BOX

**APPLICATION :
EV AXLE**

**APPLICATION : TRAILER
LID 10 KGS**

MANUFACTURING QUALITY ACTIVITIES

- Welding in SS, aluminium, carbon steel with weld Penetration and ip 65.
- RA value @ 3 and around on fabricated part.
- PPAP document default level III.
- Salt spray test for white rust and red rust from NABL lab.
- Special experience in pipe assembly & leakage proof Assemblies.

About EEPC India	13
List of Exhibitors	15
EEPC India Office Address	117

Government of Maharashtra

Office of the Development Commissioner (Industries)

Directorate of Industries, New Administrative Building
2nd Floor, Opp. Mantralaya, Mumbai 400 032.

I am delighted to see that EEPC India is hosting the second edition of Subcontract India 2025 in Pune with a focus on subcontracting prospects in seven major verticals namely Industrial Supplies & Services, Automobiles, Electricals, Oil & Gas, Construction & Mining, and Industrial Machinery & Medical Devices. Pune being a solid manufacturing hub with an advanced industrial setup is a suitable location to host this global sourcing show.

Maharashtra is India's leading industrial and economic hub, contributing nearly 15% to the national GDP – first State to cross \$500 Bn mark and accounting for over 15% of India's industrial output and 31% of FDI inflows. The State hosts more than 64 Lakh registered MSMEs and a robust base of large enterprises across sectors such as automotive, engineering, electricals, pharmaceuticals, chemicals, and emerging technologies. Its major industrial belts namely Mumbai, Pune, Chhatrapati Sambhajnagar, Nashik, and Nagpur are globally recognized for their integrated supply chains, skilled workforce, and innovation-driven manufacturing ecosystem. Supported by progressive industrial policies, strong connectivity through ports, highways, and industrial corridors, and proactive single-window facilitation mechanisms, Maharashtra continues to lead India's journey towards becoming a global hub for engineering, manufacturing, and technology-led growth.

Engineering is among India's biggest industrial sectors, adding meaningfully to the country's employment and GDP. The sector has seen impressive growth over recent decades, driven by India's rising integration into global value chains and long-term investment across high-technology sectors. Indian engineering exports now reach customers in every ASEAN country, in Africa, the EU, North America, the CIS, and West Asia, indicating the increasing global competitiveness of our sector.

The Vision Plan 2030 of the Government of India envisions making the nation a world-class manufacturing and export centre for engineering goods and construction machinery. To achieve this, subcontracting alliances are pivotal for MSMEs and OEMs to associate, innovate, and increase productivity. Subcontracting alliances facilitate the transfer of advanced technology, provide cost-effectiveness, and enhance capability development along the supply chain.

EEPC India's effort to place domestic and overseas stakeholders on a single platform will surely assist in making these connections deeper and enhancing India's role as a desirable engineering and manufacturing destination.

I wish EEPC India and all participants best wishes for the magnificent success of Subcontract India 2025.

(Deependra Singh Kushwah, I.A.S.)

Development Commissioner (Industries) and Export Commissioner,
Directorate of Industries, Government of Maharashtra
Maharashtra Industry, Trade & Investment Facilitation Cell (MAITRI)

From Chairman's Desk

I extend a warm and hearty welcome to all participants joining us for Subcontract India 2025, scheduled to be held from 6-8 November 2025 at the Auto Cluster Exhibition Area, Pune.

This event presents a unique and timely platform for Indian engineering firms and global stakeholders to come together in a spirit of collaboration and innovation. With an ambition to raise India's engineering and manufacturing export share to 10 % of global Engineering Trade pie by 2047, our focus is on strengthening the supply ecosystem through high-quality subcontracting, forward-looking design, and robust partnerships.

Subcontract India 2025 brings into sharp focus the sectors of industrial supplies and services, automotive, electrical, oil & gas, construction, mining, industrial machinery and medical devices — all critical drivers of India's manufacturing growth. The knowledge sessions and B2B interactions embedded in the event promise rich insights and valuable connections, enabling participants to scale operations, enhance productivity and integrate advanced solutions.

Pune, known for its dynamic manufacturing ecosystem and business-friendly climate, serves as the ideal venue for this congregation of

minds and markets. I encourage every exhibitor, buyer, delegate and visitor to seize the opportunities that this event affords — to network, to innovate, and to forge partnerships that will accelerate growth and global competitiveness.

In closing, I extend my sincere gratitude to all stakeholders whose support and participation underpin the success of Subcontract India 2025. May this gathering catalyze growth, foster collaboration, and contribute meaningfully to the realization of India's manufacturing potential.

A handwritten signature in black ink, appearing to read 'Pankaj', with a long horizontal line drawn underneath it.

(Pankaj Chadha)
Chairman, EEPC India

**From the Desk of Chairman,
Trade Promotions Committee, EEPC India**

It is with a profound sense of pride and purpose that I extend this message to all participants of Subcontract India 2025, being organised by EEPC India from 6 – 8 November 2025 in Pune. In an era of unprecedented global supply-chain realignment, this event stands as a vibrant embodiment of India's aspiration to climb further up the engineering-export ladder and build enduring vendor-ecosystems.

In the last financial year, India's engineering-goods exports surged to an all-time high of USD 116.67 billion, reflecting growth of 6.74% over the previous year.

Engineering exports now account for some 27% of our total merchandise exports during April – September 2025. Engineering exports continued its growth run for the fourth straight month to September 2025 with a monthly growth of 2.93 percent and a 5.35 percent year-on-year growth during the first half of fiscal 2025-26 as it went up to USD 59.36 billion in Apr – Sep 2025-26. These figures underscore both our potential and responsibility as we collectively seek export leadership.

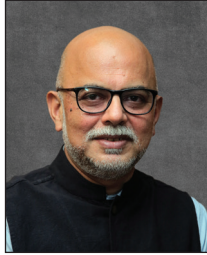

This Subcontract India, held in the industrial heartland of Pune, promises to build on that tradition—bringing together MSMEs, tier-1 suppliers, technology innovators and international buyers under one roof.

I urge participants to leverage the full spectrum of opportunities: participate in the sourcing forums, engage with international delegations, explore vendor-development programmes, and forge collaborations that will strengthen India's position in global value-chains. The engineering sector is not just a contributor to exports—it is the backbone of manufacturing competitiveness, job creation and technological innovation.

I wholeheartedly welcome you all to Subcontract India 2025 and convey my best wishes for fruitful engagements, sustainable partnerships and a collective step forward in India's export journey.

A handwritten signature in black ink, appearing to read 'Rakesh Shah'.

(Rakesh Shah)
Past Chairman and Chairman, Trade Promotions Committee,
EEPC India

ED's words

On behalf of the entire fraternity at the EEPC India, it is my privilege and honour to extend a heartfelt gratitude to all participants, exhibitors, delegates and stakeholders at the forthcoming Subcontract India 2025, scheduled from 6-8 November 2025 at the Auto Cluster Exhibition Area, Pune.

As the industry moves deeper into a new era of global competition, technology integration and sustainable growth, this event assumes tremendous significance. Subcontract India 2025 brings together key segments such as automobile, electrical, oil & gas, construction & mining, industrial machinery and medical devices — all vital engines of India's manufacturing and export thrust.

Our mission at EEPC India is to strengthen the Indian engineering ecosystem — especially enabling MSMEs to scale, to integrate seamlessly into global supply chains and to deliver world-class solutions. Subcontract India 2025 is more than an exhibition; it is a dynamic platform for B2B connect, technology collaboration, vendor development and investment partnerships.

To all exhibitors: I encourage you to showcase your innovation, capability and quality with pride. To all overseas buyers and delegates: leverage this opportunity to forge meaningful relationships, source reliable partners and engage with India's vibrant manufacturing base. To every visitor and industry enthusiast: participate actively, absorb insights from our knowledge sessions and connect with the ecosystem.

May the three days ahead prove to be a catalyst for business growth, collaboration and realization of India's full potential as an engineering hub.

(Adhip Mitra)

Executive Director & Secretary, EEPC India

EEPC India 70 Years of Excellence in Engineering Exports

EEPC India has been the Face of Indian Engineering exports for more than 70 years and with its multifaceted approach, has helped Indian engineering exports achieve a remarkable leap, as India grew from a meagre \$10 million engineering export nation in 1950s to USD 116.67 billion (Apr 2024– March 2025). Regarded as a model Export Promotion Council of India by the Union Ministry of Commerce and Industry, EEPC India has emerged as a premier trade and investment promotion organisation, sponsored by the Ministry of Commerce and Industry, Government of India.

Over the decades it has successfully bridged the huge gap between India's Engineering Industry and the Global Export Market running into trillions of revenue, helping to implement the dream of 'India Shining.'

EEPC India is a leader in many respects: It is the First Indian EPC to have an ISO certified website, first in-house Technology Centre and to E-catalogue the product profiles.

As an advisory body it actively contributes in the Government of India's policy making and is the prime conduit between the Indian Engineering fraternity and the Indian Government.

Set up in 1955, EEPC India has around 10,000 members, 60% from MSME sector. It empowers Indian engineering enterprises to navigate international trade complexities and gain growth in an extremely competitive global market.

EEPC India's targeted market research, skill enhancement programmes, and capacity-building workshops, help to equip domestic engineering firms with necessary tools to understand international demand trends, refine product offerings, and meet stringent quality standards.

EEPC India has been organising promotional activities like buyer-seller meets (BSM) and managing 'India Pavilion' at various overseas exhibitions highlighting capabilities of Indian Engineering Industry. INDEE (Indian Engineering Exhibition), and IESS (International Engineering Sourcing Show) are two such flagship events enabling Indian exporters to showcase their innovations to a broader audience, opening doors to new markets

A G ELECTRO SERVICES

Plot No.6 , Koyana Industrial Estate, Pune - Bangalore Road
Malkapur, Tal. Karad, Dist. Satara-415110, Maharashtra, India

E-mail	:	adarsh@agelectricmotors.com
Website	:	www.agelectricmotors.com
Name of the Chief Executives	:	Mr. Shridhar Ramdurgkar Founder and Managing Partner Mr. Adarsh Shah Import Export Manager
Range of Products	:	Electricals-Motors
Countries of Export	:	Australia, Canada, Czech Republic, UK,USA

About the Company

We take this opportunity to introduce ourselves as AG Electric Motors (AG Electro Services) & Cryotech and would like to serve you our specialized experience of 50 + years in design, manufacturing as well the constant improvements made in the field of Electric Motors, Stampings. We are being well regarded as a quality supplier (with CSA International approved factory and ISO 9001:2015 and CE certified also IATF and ZED Gold Certified) at the best price and extremely fast component developers.

ACCURA TECH

Plot No. G-8 MIDC, Shirol
Kolhapur-416122, Maharashtra, India

E-mail	:	admin@accuratech.in
Website	:	www.accuratech.com
Name of the Chief Executives	:	Mr. Amar Jadhav MD Mr. G A Sankpal Head Marketing
Range of Products	:	Automobile, Engine Components- Pistons, Precision Machined Components
Countries of Export	:	Germany, Italy

About the Company

We are single source for most of the critical components which itself describes the faith of our customers & allow us to hold our market. Our upgraded latest technology infrastructure is ready for fully Machined, Critical & Precision Parts like Cylinder Heads & new product of upcoming Industry / Emerging market. We are IATF 16949 certified company. We have developed Aluminium Cylinder Head for Single Cylinder Engine Through Gravity Die Casting Route using Auto Pouring Facility with Scada System.

ADINAL ENGINEERING PVT LTD

Crescent Innovation and Incubation Centre (CIIC), Block-2
Office Number-9 & 8, Seethakathi Estate, G.S.T Road, Vandalur
Chennai-600048, Tamil Nadu, India
